BIOTA™

Microbial agent for water treatment
Bacillus spp.

How to use Biota for water neutralization

1 Bag / 4 Rai
(6400 m²)

Tear the bag

Spread to the pond
without fermentation

- ▶ Reducing pathogen growth
- ▶ Neutralizing the water in still water
- ▶ Reducing the dreg accumulation/
bottom sludge No smell in sludge
- ▶ Usable in all water conditions, this is an anaerobe
microorganism

Caution: Do not use with antibiotics

Suggestion: For the best outcome, uses Biota Aqua continuously
over the feeding

BIOTA_{Pro}

How to use Biota for food mixing

BIOTA

5 grams/1 kilogram of feed
(1 teaspoon)

Mix together

1 bag/200 kilograms of feed

Feed the fishes

- ▶ Neutralizing digestive system of fishes, enhancing the nutrient absorption
- ▶ Appetizing the feed
- ▶ Better FCR value
- ▶ Immunity reinforcement

Caution: Do not use with antibiotics. After mixing, do not expose the sun light

Suggestion: For the best outcome, uses Biota continuously over the feeding

Probiotic microorganism has been certified from Department of Livestock Development

Mixable with feed without hazard Registration No. 01 04 57 0563
